Brisbane North PHN will help you complete a clinical audit and quality improvement exercise targeting patients with asthma, COPD or diabetes.

Our staff will show you and your practice staff how to analyse your practice data to:

- identify patients at risk
- improve recall procedures
- provide tailored patient care
- find support services for your patients
- improve practice management.

**Quality improvement**

Once you have analysed your data, our team will help you ensure you are providing best practice care to your patients who suffer from asthma, COPD or diabetes.

They will show you how you can use the Map of Medicine program to access comprehensive, evidence-based local pathways and clinical information at the point of care.

**CPD and accreditation**

Taking part in this project will help you fulfil the QI part of your CPD requirements and help your practice achieve accreditation.

**Register**

Register your interest for the Clinical Audit by filling in your details below and returning to Brisbane North PHN or for more information contact 07 3490 3431.
